"If you have any specific dietary requirements or require allergy information, please ask your server. However, please be aware that food containing allergens are prepared and cooked in our kitchen."

The science behind our sexy burgers... When our 3oz patties are smashed onto a scorching hot grill, the amino acids and sugars within begin reacting. This is known as the Maillard reaction and the extreme heat and pressure, along with a larger surface area, supercharge this reaction. The result is a beautifully dark, crisp-crusted and flavour-packed patty.
